Impressions™ Integrated Storm & Entry Door System

1 Choose a **Therma-Tru® single entry door*** to create an entry that complements your home's architectural style.

2 The Impressions system comes standard with **composite brickmould** and an aluminum storm door panel. For added protection from rotting, choose a **composite frame featuring Tru-Guard™ composite technology**.

3 Selecting the perfect hardware is the final step in upgrading your entryway. Therma-Tru's **lever-style MPLS handlesets**** pair with **QuickFit™ hardware**. Both feature on-trend designs and finishes.

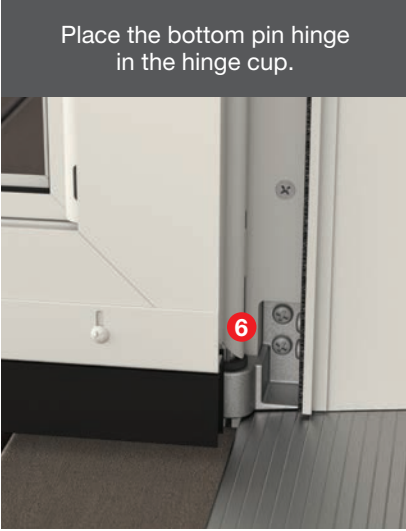

4 For your **full-lite aluminum storm door**, choose Low-E glass, for lower solar heat gain between the storm door and entry door, or clear glass. The storm door also comes with an interchangeable screen, so you can enjoy a fresh breeze while keeping pets and small children safely inside, and insects and debris out.

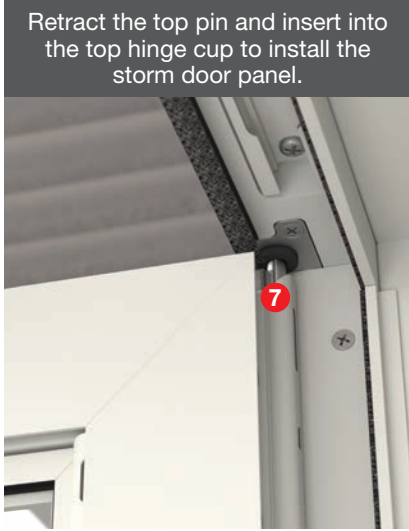

5 The storm door features a modern profile with mitered corners for a sleek, on-trend look that emphasizes the beauty of the entry door. The storm door panel fits into Therma-Tru's **flat-profile composite brickmould**.

The storm door is easy to install at the jobsite.

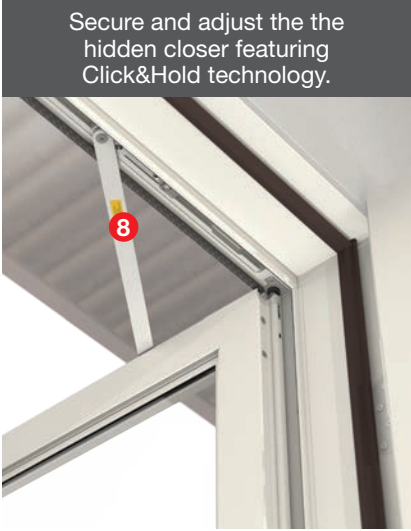

The concealed hinges featuring retractable pins 6 & 7 and the revolutionary hidden closer with Click&Hold™ technology 8 enable a quick and intuitive installation experience. The storm door panel is handed in the field, simplifying what you need to order. After the installation of the entry door, hand your storm door by installing the closer, sweep and hardware. Then, follow these three simple steps to complete the job.

Place the bottom pin hinge in the hinge cup.

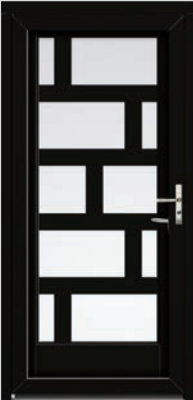

Retract the top pin and insert into the top hinge cup to install the storm door panel.

Secure and adjust the the hidden closer featuring Click&Hold technology.

Top: Impressions Storm & Entry Door System – IM100, Finish – Brown; Fiber-Classic Oak Collection, Clear Glass with SDLs, Door – 2150, Finish – Driftwood
*Compatible with with most 6'8" single entry Therma-Tru doors.
**Not suitable for use with Therma-Tru grip-style handlesets.

Tru-Advantages

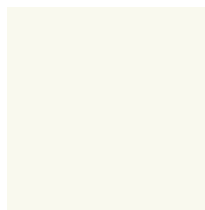

- The Impressions integrated storm and entry door system* is the first of its kind, with the storm door integrated flush into the brickmould portion of the door frame, creating a purposeful, cohesive unit that provides a seamless look.
 - Take the guesswork out of ordering the right size storm door for your project by choosing an integrated system engineered to work together.
- This storm and entry door system from Therma-Tru, in partnership with LARSON, provides a beautiful, purposeful aesthetic that will complement your home's architectural style.
 - Choose from a wide variety of Therma-Tru® door styles** with clear, decorative, privacy and textured glass, or no glass at all, to create a look you love.
 - Frame your entry door by choosing a coordinating storm door color that blends in with your entryway or make a bold statement with a contrasting color.
 - Pairs well with Therma-Tru lever-style MPLS handlesets including Heirloom, Venture and Millennium.***
- The storm door offers additional protection from the elements, keeping your entry door looking beautiful for years to come.
- Our products work together to create a complete system backed by outstanding warranties.
 - The Impressions integrated storm and entry door system is included in Therma-Tru's full-system limited warranty.
